BPW iC PLUS.

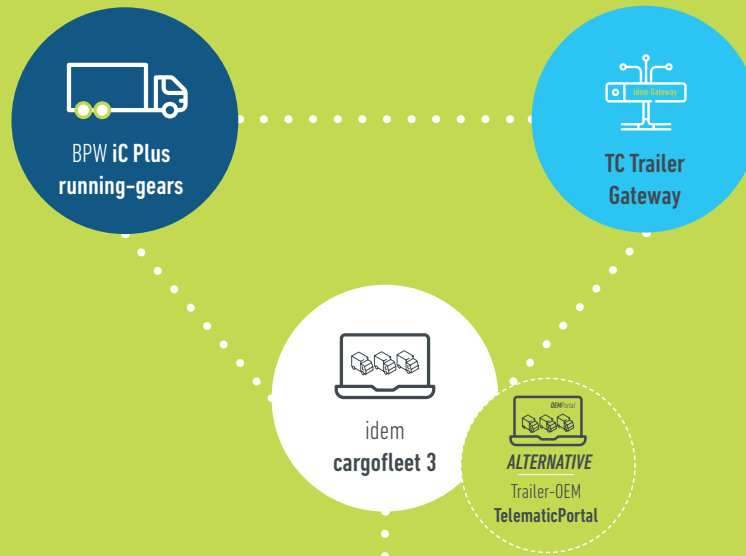

KNOWING WHAT'S NEXT!

Trailer maintenance management is one of the most important tasks in everyday transport - and at the same time one of the most time-consuming. But what if the running-gear components could independently predict when they need to be serviced? What if sensors and intelligent algorithms, rather than rigid maintenance intervals and mileage, were to decide on workshop visits?

The new iC Plus generation of running gear from BPW opens the door to intelligent predictive maintenance and thus enables you to carry out highly efficient, costsaving and sustainable maintenance, efficient, cost-saving and sustainable maintenance management of trailer trailer running gear in vehicle operation.

Benefit from increased operational reliability of your vehicles and fewer unplanned downtimes and maximum planning efficiency.

I SEE PLUS

Axle load sensing

BrakePerformance Monitor

Brake pad sensing

Air suspension detection

Maintenance calendar

Digital Maintenance instructions

YOUR ADVANTAGES AT A GLANCE

- ✓ Time savings in maintenance management for the fleet operator
- ✓ Needs-based maintenance instead of regular maintenance intervals
- ✓ Reduction of unplanned vehicle breakdowns
- ✓ Increased safety for driver and vehicle
- ✓ Optimised cost control for maintenance and repair
- ✓ No more changing spare parts too early or too late (sustainability)

Knowing what's next!
